

RECIP SAW BLADES DIAMOND/DOUBLE TANG

- **LASTS 6X LONGER**

Nickel alloy-brazed diamond particles maintain sharpness to keep cutting after conventional carbide grit fails. Double tang versions extend the life of the blade six times longer (9" & 11" blades).

- **CUTS 3X FASTER***

A narrow kerf design enables thinner, faster cuts.

- **DOUBLE TANG**

Allows end user to flip blade around reducing amount of wasted grit and maximizing cost per cut.

- **STRAIGHT, CLEAN CUTS**

Unlike bulky snap cutters which crush pipes and leave ragged, uneven cuts, LENOX DIAMOND cuts clean.

- **VERSATILE**

Cuts cast iron, tile, brick and natural stone.

* Speed measured cutting 4" cast iron pipe at maximum speed vs. the leading competitor.

P/N 19283 - 8" LENGTH
P/N 19284 - 9" LENGTH, DT*
P/N 19285 - 11" LENGTH, DT*

*DT = Double Tang
